---

## SUMMARY

**Full-Stack Developer** with 1 year of experience building dynamic web applications using **JavaScript**, **TypeScript**, **Node.js**, **React**, and **databases**. Strong ability to work in fast-paced environments, contributing to the development of efficient, scalable applications. Skilled in collaborating on projects that improve user experience and deliver impactful results.

---

## EXPERIENCE

### Full Stack Developer | AIME | 2023

- Developed **front-end** and **back-end** applications using **TypeScript**, **JavaScript**, **Node.js**, and **MongoDB**, contributing to overall system performance improvements.
  - Collaborated on AI, 3D, and Metaverse projects in an agile environment.
  - Built a platform for designers to upload and view models in real-time, streamlining workflow and reducing development time.
- 

## EDUCATION

**B.Sc. Computer Science**, Hadassah Academic College, 2020 – 2024

---

## PROJECTS

### Expense and Budget Web Application

- **Technologies:** Java Spring-Boot MVC, Thymeleaf, HTML, CSS, MySQL
- **Description:** Built a secure back-end web application for managing expenses with server-side logic and Spring security, enhancing the functionality of financial tracking for users.
- **Impact:** Delivered a user-friendly application with secure data handling and real-time reporting features.

### E-commerce Movie Store Web Application

- **Technologies:** ReactJS, JavaScript, Spring Framework, SQL Server
- **Description:** Developed an e-commerce site with ReactJS frontend and Java Spring backend.
- **Impact:** Improved shopping experience with responsive UI and reliable backend.

### NASA Social Site

- **Technologies:** Node.js/Express, JavaScript, HTML, CSS, SQLite, session, cookies
- **Description:** Created a social platform integrating NASA's API with a login page.
- **Impact:** Provided an engaging platform with secure authentication and real-time updates.

### Game - Bulls & Cows

- **Technologies:** React, Bootstrap, Java, Servlet
  - **Description:** Developed an interactive game with a responsive UI and backend high score management.
  - **Impact:** Delivered an engaging user experience with robust data-driven game play.
- 

## TECHNICAL SKILLS

**Programming Languages:** JavaScript (ES6), TypeScript, Python, Java, C++

**Web Development:** React, Node.js/Express, HTML, CSS, Bootstrap

**Database Technologies:** SQL, MySQL, PostgreSQL, MongoDB

**Other:** Linux, Visual Studio, Git, Docker, NLP

---

## LANGUAGES

**Hebrew:** Native proficiency **English:** Fluent
